

Siguiiri Gold IPO Update

Siguiiri Gold Corporation (proposed ASX code **SGD**, “**Siguiiri Gold**” or the “**Company**”) advises that it has withdrawn its Initial Public Offering (IPO) under the Prospectus dated 1 July 2024 due to ongoing delays in the grant, renewal or conversion (collectively referred to as grant) of its Permits in Guinea.

The Company has been advised by the Guinean Ministry of Mines that these delays are for administrative reasons only, resulting from the implementation of a new mining title system and supporting processes.

The Company is not aware of any reasons why its Permits will not be granted.

Siguiiri Gold remains committed to listing on the ASX and intends to issue a new full Prospectus following granting of its Permits.

The Guinean Ministry of Mines has again assured the Company that its Permits will be granted in the near future.

The Seventh Supplementary Prospectus, which is on the Company’s website, withdraws the IPO.

Siguiiri Gold Chairman, Michael Minosora commented,

“While the ongoing delays in Guinea have been frustrating as the grant of the Permits is a condition of the IPO, the Board and management remain fully committed to list on the ASX once they are received. The Board and management believe its flagship Siguiiri Gold Project is highly prospective. Located in the Siguiiri Basin, Guinea, the Project is in the same region as several world-class gold mines, including the nearby AngloGold Ashanti +270,000AuOz/annum SAG Mine. We look forward to providing further updates soon as we re-launch our IPO.”
